### Main Regulatory Sizes and Quantities

Maximum quantities authorized per fisher:  
In Charente-Maritime, per tide  
In Vendée, per day

### Best Practices

#### For responsible fishing of natural habitats

Some natural habitats are particularly fragile. Respect them by favoring gentle fishing techniques: avoid turning over mud and sand, and put rocks back after having lifted them.

Returning rocks ensures the survival of the species that grow there.

*\*In Charente-Maritime, the maximum daily shellfish harvest is fixed at 5 kg, all species combined. The information in this leaflet is provided for guidance and does not replace official regulations (ministerial, prefectural, and municipal orders).*

### For resource-respectful fishing

- 1 - Respect the minimum regulatory harvest sizes to allow individuals to reproduce; use a measurement tool, re-bury undersized shellfish.
- 2 - Take only what you will consume within the family context, while respecting the maximum authorized quantities.
- 3 - Release crustaceans carrying eggs.
- 4 - Do not fish in ports, near oyster farms, bouchots (25 m in Charente-Maritime, 15 m in Vendée) and inside fish locks.
- 4 - Inform yourself about the regulation applicable to the site where you are fishing: authorized harvest quantities; tools, and seasons are variable from one department to another.
- 5 - Inform yourself about permanent or temporary prohibited zones.

### By respecting best fishing practices, you preserve the resource and the marine environment. You thus contribute to ensuring this leisure activity remains accessible to all for a long time.

Sabellaria worm reefs (worms building sand tubes) are fragile and sensitive to trampling.

In seagrass beds (aquatic plants hosting many species), prioritize hole-fishing without damaging the plants and follow the channels (water flow paths) to move around.

- €500.00 for the Mobile Home. In the event of dilapidation of the Mobile Home, outdoor furniture, indoor equipment (household appliances, dishes, etc.), the price indicated on the inventory will be retained from the deposit.

The deposit(s) will be returned after the exit inventory only if all conditions are met.

Exceptionally, upon request from the holidaymakers and authorization from the manager, a departure without a contradictory "outgoing" inventory may be accepted (for traveling at night or early in the morning, for example).

The reports of the condition of the mobile home and its cleanliness will be carried out by a Campsite Agent.

If the condition does not comply with the "incoming" inventory, the deposit(s) will be immediately cashed. If it does comply, the deposit(s) will be returned according to the holidaymaker's request.

In case of cancellation of a booked stay, the deposit will not be refunded whatever the reason.

In case of early departure during a booked stay, 50% of the amount of the unoccupied stay will be payable.

In case of force majeure (illness, death, etc.) and upon presentation of supporting documents, these provisions will not be applied.
